

BAR LENTO · 158 8TH AVENUE, NEW YORK

Welcome to the Bar Lento app

Your shifts, your hours, your documents — in one place, on your phone.

This app was designed and built entirely by Simone Viola, owner of Bar Lento, for the team: to make work easier, to keep everything in one place and to make sure nothing gets lost — for the team and for each of you personally.

Here you find the weekly schedule, who is working today, whether the bar is open, closed or hosting a private event, your clock-ins and hours, your weekly report, and every document you sign — all tracked, all yours to check whenever you want.

IMPORTANT: WHAT THIS APP IS NOT

It does not replace Toast. Clock-ins and clock-outs are still done on the Toast terminal with your own account, and pay is handled through payroll as always. The app only shows you what has been recorded, so that you and Bar Lento always look at the same numbers.

ONE CHANNEL FOR EVERYTHING

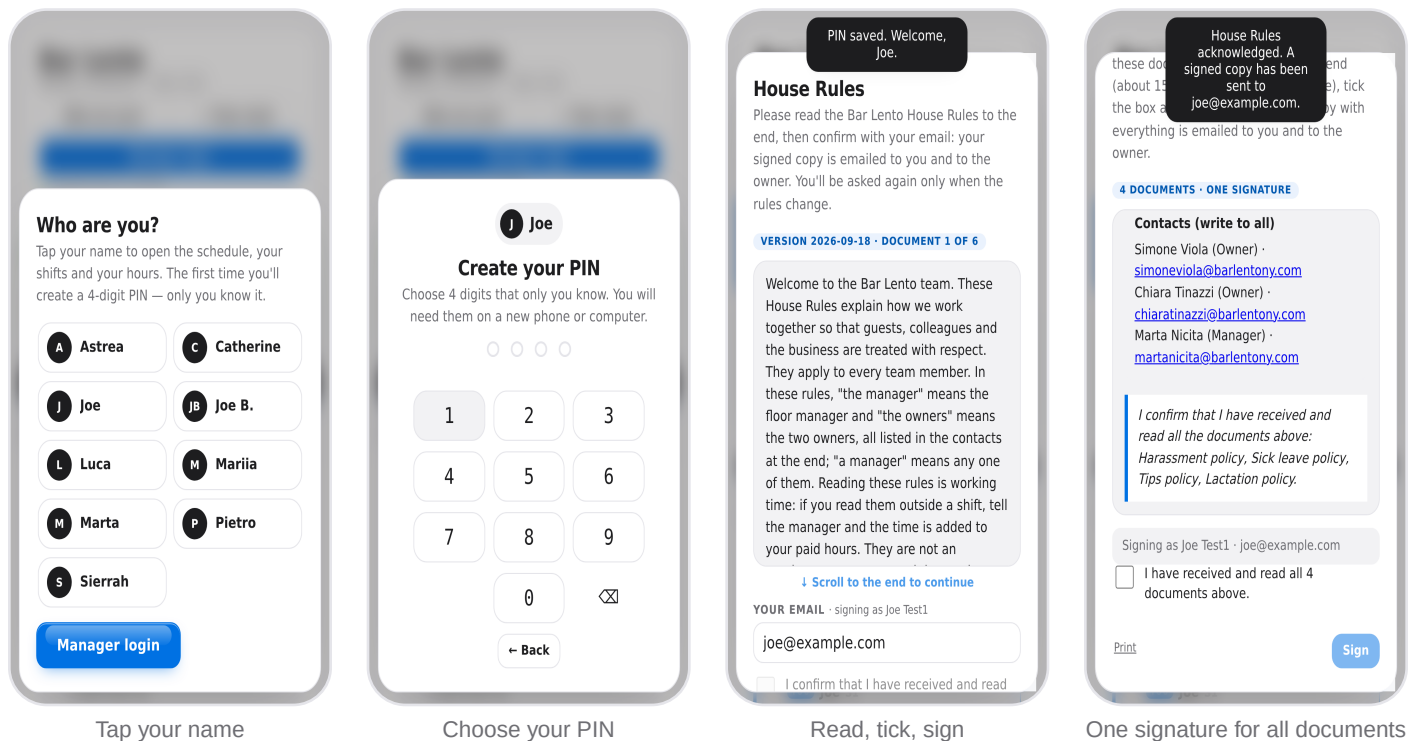

Schedules, changes, closures, events, reports, documents: everything arrives here (and by email), not in scattered chats. WhatsApp is for talking; the app is where things stay on record.

bar-lento.vercel.app

Open the link on your phone and add it to your Home Screen (Safari: Share, then Add to Home Screen; Chrome: menu, then Add to Home screen). It works like an app.

1. Your first time: three taps

- Tap your name. You are already there: the list comes from Toast.
- Choose a 4-digit PIN. Only you know it. You will need it on a new phone or computer; the one you use is remembered.
- Read the House Rules and the documents New York law asks every employer to give you. Your email is already filled in (the same one you use in Toast): tick the box, tap Sign, done. Your signed copies arrive by email.

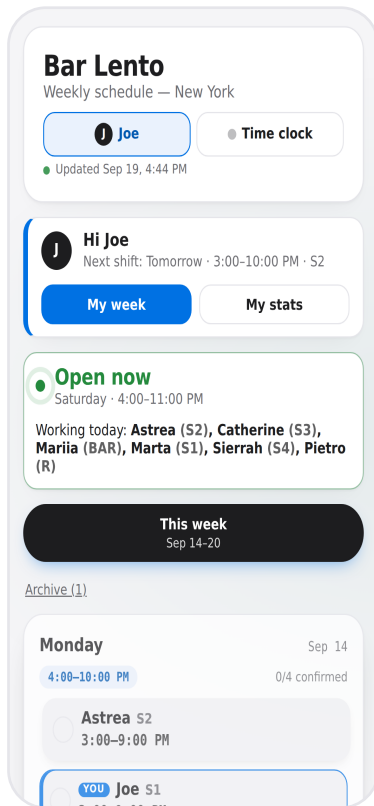

USE YOUR TOAST EMAIL, ALWAYS

The email in the app is the one Bar Lento has in Toast. Please keep it the same everywhere. If you ever change it in Toast, the app follows automatically; still, tell Simone so nothing gets lost.

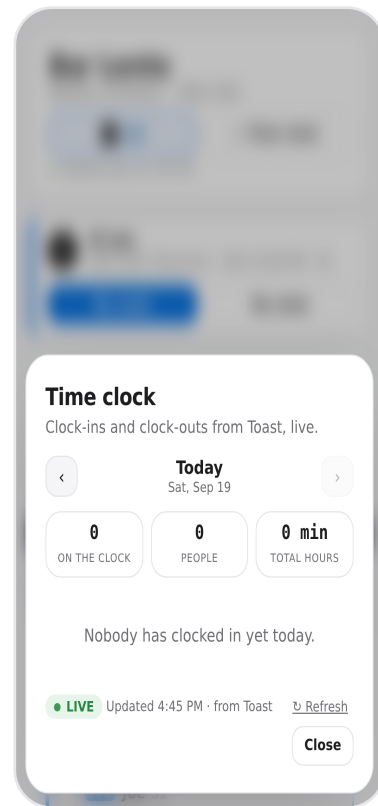

2. Every week

- Home shows today at a glance: open or closed, the hours, who is working. When the bar is closed for a holiday or a private event is on, it says so.
- The week below lists every shift. Your shifts are marked YOU. Tap yours and confirm: it tells the manager you have seen it.
- A new week is published on the app; you get one notification. Changes that affect you arrive as one summary, never spam, never at night.

- Time clock shows who is on the clock right now and past days, straight from Toast.

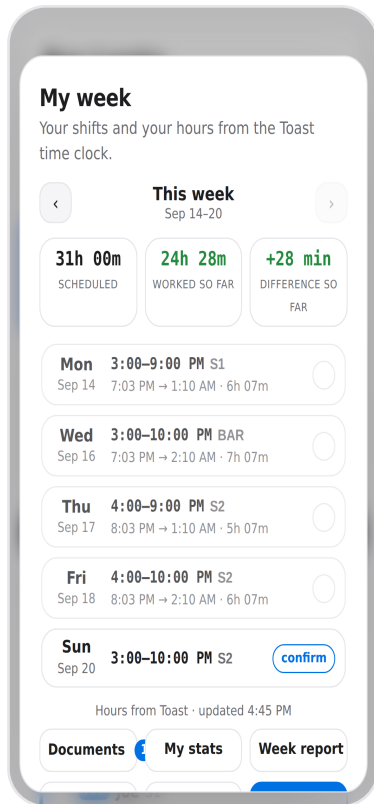

Home: today and the week

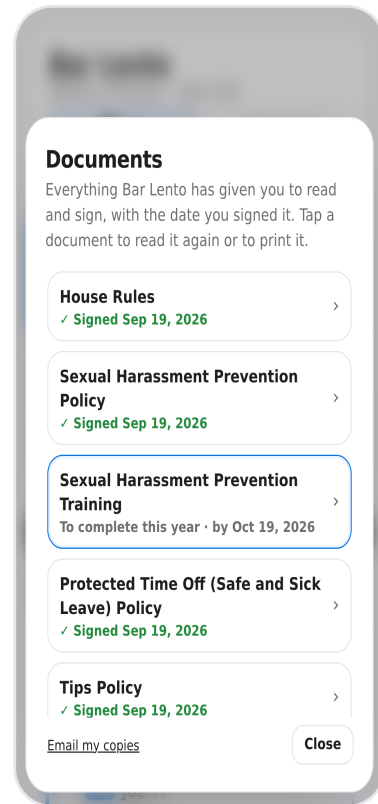

Time clock, live from Toast

3. Your hours and your report

- My week shows your scheduled shifts next to your real clock-ins from Toast, day by day, with the hours worked.
- Week report downloads a PDF of your week: every clock-in and clock-out with the exact times, hours per day, weekly total. Times and hours only — nothing about pay.
- Every Sunday night the same report arrives by email, automatically. The owners see exactly the same numbers: if something does not match, say so right away.
- My stats shows your own numbers only. Nobody sees anybody else's.

My week: shifts, clock-ins, hours

Documents: everything you signed

4. Your documents

- My week !' Documents lists the House Rules and every policy you signed, with the date. Tap one to read it again or print it.
- Email me my signed copies sends them again to your email whenever you want.
- Once a year (January) the State training video is asked again: a free 30-minute refresher, nothing to hand in.

5. If you are not in Toast

A few people (temporary jobs, salaried staff) do not clock in on the Toast terminal. For them the app has a Clock in / Clock out button: tap it when you start and when you finish. It is recorded with the exact time and shows in the time clock, in My week and in your report like everyone else's.

Hi Pietro

Next shift: Today · 6:00-10:00 PM · R

My week

Clock in

Clock in / Clock out, only for people not on Toast

6. Good to know

- Your data is confidential and used only to run Bar Lento. What is stored and why is written in plain words at bar-lento.vercel.app/legal.html.
- Records that the law requires (schedules, hours, signed policies) are kept as long as the law requires, also after someone leaves.
- Questions about the app, your hours or a document: ask the manager or an owner.
